

Protocol

Date 30.11.2006
Time 14:50 bis 17:30
Place SEM1/019
Participants Alexander, Carola, Katrin, Marc, Ria, Ronny
Protocol Carola

Theme: Conception details for „Learn“

- Katrin and Ria explained their ideas for „learn“, which include the structuring (Color, Contrast, Composition) and the elaboration of new exercises
- tasks for programming: possibility to make chips unmoveable
- the grey box on the left side could be replaced by the palette for exercises or included to text field, the arrows are painted outside
- the XML-Parser will be extended

Theme: Conception „start“

- To change between the to parts „create“ and „learn“ it will be necessary to open the main menu (start menu)
- it should contain a new menu: options
- options: change between „basic“ and „complex“ mode, change language

We will start implementing from now on.

Todo:

It's not necessary to finish these tasks. You should just begin to work on some of them.

<i>Who?</i>	<i>What?</i>
Katrin, Ria	<ul style="list-style-type: none">• Work on conception for „learn“• help menu
Marc	<ul style="list-style-type: none">• Icons for help, options, go to main menu, send to front, send to back, snap to grid, (grid on/off)• choose better contrasts for the icons• rotation, scale of objects
Ronny	<ul style="list-style-type: none">• Shadows• menu for „save“, file chooser, file filter -> present a visual concept on monday
Nico	<ul style="list-style-type: none">• Different histories for „learn“ and „create“• saving of files
Alex	<ul style="list-style-type: none">• Menu for palette and grid -> present a visual concept on monday• preview for grid changes• click problem

<i>Who?</i>	<i>What?</i>
Carola	<ul style="list-style-type: none">• Options menu -> present a visual concept on monday• overwork the exception handling

Next meeting:

- Monday 4.12.06, 11:10, SEM1/019
