

Protocol

Date 18.12.2006
Time 10:00 bis 12:30
Place SEM1/019
Participants Alexander, Carola, Katrin, Linda, Marc, Ria, Ronny
Protocol Carola

Theme: **miscellaneous**

- A while ago Linda wrote an abstract about our work for a conference on color theory: it was accepted
- how should the program be published? (free download, sell, serial number...)
-

Theme: **design details**

- Ria and Katrin worked out a new XML-Scheme
- Ronny thinks about making the color chooser more interactive: the outer circle could change color with the selected color, so that all colors of the outer circle are mixed with the same white, grey or black as the selected color
- in the exercises we will use a color scheme with 12 discrete colors
- we have to think about which new methods are needed for part „learn“
- for part „learn“ we will use Linda's paintings for exercises

Todo:

<i>Who?</i>	<i>What?</i>
Carola	New structure for menu XML
Ronny	Scan Linda's slides
