

## Protocol

Date 11.01.2007  
Time 15:00 bis 17:30  
Place SEM1/019  
Participants Alexander, Carola, Katrin, Linda, Marc, Nico, Ria, Ronny  
Protocol Carola

### Theme: Programming

- When the programm is startet the first time, a window will ask the user about the option settings (language and mode)
- Loading files is possible now
- there are some things to do in part learn: navigation should not show all sublessons, there are problems with calculating the layouts
- memory exercise: we need a method that goes two steps back in the history, maybe we can use the send to front and send to back methods, we will read the actual colors and calculate if they fit or not according to the xml file

### Theme: Content

- Discussion about how the exercises quantity and simultaneous contrast work: quantity: moving the shape the middle moves all other shapes, simultaneous: there has to be a workbench in lower part

### Theme: Icons

- New icons with more grey tones will be reduced in their contrasts
- Marc presented his ideas for the logo, we will use this to work it out finally
- it should be possible to create the new logo with the programm, so we can use it as an intro and as an icon

### Todo:

<i>Who?</i>	<i>What?</i>
all	Think a about the new logo
Katrin	Create icons for the color schemes
Carola	Work on the parser and the exercises
Marc	Icons

### Next meeting:

- Monday 15.01.06, 10:00, SEM1/019
