

Protocol

Date 15.01.2007
Time 10:00 bis 12:30
Place SEM1/019
Participants Carola, Katrin, Linda, Marc, Nico, Ria, Ronny
Protocol Carola

Theme: Programming

- There are problems with the parser and some files, which should be displayed in german
- problems on apple: no space between text and picture in the navigation bar
- masks which cover the triangles in a exercise in the learn part are not big enough
- calculate sizes according to width of the screen (this should become part of the requirements)
-

Theme: Content

- discussion about content
- there should be no lesson without pictures
- maybe the text should not be displayed in one long line, but in columns
- maybe introduce „themes“ for each chapter
- idea for color schemes: there could be another exercise which allows to use the chosen color scheme on a workbench and to change the scheme afterwards again (maybe this could be part next semester)

Theme: Icons

- We need a picture to visualize that the user should use his mouse (dragging) to work on the exercises

Next meeting:

- Thursday 18.01.07, 15:00, SEM1/019
