

## Protocol

Date 22.01.2007  
Time 10:00 bis 10:45  
Place SEM1/019  
Participants Alexander, Carola, Katrin, Linda, Ria, Ronny  
Protocol Carola

### Theme: learn

- the picture of a circle within the layout „color schema“ is displayed wrong
- the exercise of „quantity contrast“ is displayed to far left
- the workbenches should have the same size
- create new layout scheme for „simulatous contrast“
- overwork the layout for „memory“: the lower text pane should be smaller
- there is still a repaint() problem or something, when leaving the navigation
- the navigation should be overworked like this: it should be possible to flip open headings, but only one at a time

### Theme: create

- There are two bugs: sometimes the moving objects do not snap to the correct grid, but to another which does not exist
- the other problem is the rounding error which causes that object are the wrong place after loading a file

**Next meeting:**

- Thursday 25.01.07, 15:00, SEM1/019
